MonthView Control missing in Excel 365

Thank You. May 7, 2010 Some time ago, I discovered that Microsoft did not open source their MonthView control. I searched until I found a a place to download a stable version. May 5, 2010 I'm using Microsoft Excel and I need this month view control because it can be used to select the current month and previous month in a spreadsheet. You can see this in the following image with the previous month selected. As you can see in the image, a full month can be selected. I can't find a download of this control, so, I'm going to be working on a macro that will show the months on the worksheet based on the date in the range A1:C1. I need to be able to select every month by clicking on the month and select the previous month. April 27, 2010 Hi. Can someone tell me if the MonthView control is available to purchase from the Microsoft website? I can't seem to find it there and I really need to figure out a workaround for this old control, which is essential for my project. April 27, 2010 Thank you Michael for your email. [The outcome of pre-dialytic treatment with sodium bicarbonate in a patient with chronic tubulointerstitial nephritis]. A male patient aged 27 years was treated for several years with increasing doses of the diuretics amiloride and spironolactone. These drugs were used before and during dialysis. The patient developed a high blood pressure (180/100 mmHg), a moderate volume overload (12.2 kg/m2) and the renal function deteriorated (GFR 4.9 ml/min). The duration of pre-dialytic treatment with sodium bicarbonate was six months. The latter resulted in a significant increase of the diuresis (to 11.5 l/day), a reduction of the blood pressure to 140/90 mmHg and an improvement of the renal function (GFR 8.2 ml/min) after three months. The diuretics were discontinued and a maintenance dose of 3-4 g/day sodium bicarbonate was prescribed. The patient was dialysed three times a week until he was transferred to a peritoneal dialysis programme.Perceptual change in the fetus--video documentation. Perception of various aspects of the mother-fetus relationship in late pregnancy, around delivery and in postpartum has been analyzed through a close observation of video recordings of three gravid patients. The research was applied to the study of childbearing for professional reasons. Infant subjects were selected from a population of 40 healthy pregnant women. As an objective basis for a comparison, an analysis of a first phase of labor was carried out. The observation leads to the conclusion that a significant change in the perception takes place with the onset of labor: the perception of the fetus becomes more autonomous f678ea9f9e
